PROFESSIONAL SUMMARY

Computer Science undergraduate (B.Tech, 2027) and software engineer experienced in building scalable web applications and data services. Proficient in Python, Java, JavaScript, and TypeScript with a strong foundation in data structures, algorithms, and core OOP principles. Proven ability to write modular, testable, and production-ready code. Motivated to collaborate in agile, fast-paced environments, assist with technical troubleshooting, and leverage problem-solving skills to ship robust solutions.

EXPERIENCE

Software Engineering Intern | *Itrik Softech Private Limited* *Jan 2026 – Jun 2026*

- Supported the design, development, and deployment of scalable backend features, REST APIs, and data services using Node.js, focusing on clean, maintainable code.
- Assisted with debugging, defect resolution, and application performance improvements, engineering secure JWT authentication workflows to ensure robust data integrity across endpoints.
- Participated in daily standups, sprint planning, and agile development practices, collaborating closely with peers to review code and deploy reliable infrastructure.

TECHNICAL PROJECTS

Saamne (AI Mock-Interview Platform) | *Full-Stack Developer* GitHub
Next.js 15, TypeScript, React 19, Gemini API, Monaco Editor, Tailwind CSS, Zod

- Engineered a full-stack AI mock-interview platform featuring real-time voice interactions, live coding, and Zod-validated LLM feedback reports across 3 simulated interview rounds.
- Architected a secure code execution engine for 4 languages (Java, Python, C++, JS) with strict time constraints, injecting hidden performance tests to dynamically reject brute-force algorithmic solutions.
- Optimized voice-response latency by 2–3x (to 1.2s) by streaming Gemini LLM output to speech synthesis sentence-by-sentence, and built PDF resume parsing to dynamically generate personalized technical questions.

TaskFlow | *Software Engineer (Backend)* GitHub
Node.js, TypeScript, MongoDB, Redis, Docker

- Engineered a distributed background-job system in TS and Node.js with a priority Redis queue, sustaining ∼200 jobs/sec at p99 latency under 85 ms in load tests.
- Implemented idempotent job creation, dead-letter handling, and exponential backoff retries, scaling to 4 Dockerized services processing ∼4,000 jobs with zero failures.
- Built heartbeat-based crash recovery that requeued 100% of in-flight jobs after simulated worker crashes, modeling 6 job lifecycle states in MongoDB using core OOP principles.

AI Study Planner | *Full-Stack Developer* Live | GitHub
Node.js, Express, MongoDB, React, AI Integration

- Built a MERN stack application with 44 REST endpoints across 6 MongoDB models, efficiently managing user sessions, robust gamified progression, and complex state management.
- Designed 9 compound indexes that cut NoSQL query latency by 91% (167 ms to 15 ms) and scanned 99.9% fewer documents in benchmarks with 100K seeded tasks.
- Integrated a Gemini AI agent with dynamic function-calling to automate server-side logic, and built a RAG pipeline with OCR text extraction to securely process file uploads.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, SQL, HTML, CSS
Frameworks & Environments: Next.js, Node.js, Express.js, React, Tailwind CSS
Databases & Tools: MongoDB, MySQL, Redis, Git, GitHub workflows, Docker
Core Competencies: Data Structures & Algorithms, REST APIs, Object-Oriented Programming, Agile, Debugging

EDUCATION

Ajay Kumar Garg Engineering College (AKGEC) Ghaziabad, India
Bachelor of Technology in Computer Science and Engineering *2023 – 2027*
Relevant Coursework: Data Structures & Algorithms, Object-Oriented Design (OOD), DBMS (MySQL/MongoDB), Operating Systems.

ACHIEVEMENTS & PROBLEM SOLVING

- **Algorithm Design & Optimization:** Showcased a strong problem-solving mindset by solving over 300 Data Structures and Algorithms problems in Java on LeetCode, emphasizing core OOP paradigms.
- **Competitive Programming:** Cleared Rounds 1 & 2 of HackWithInfy by rapidly diagnosing code defects and delivering bug-free solutions under strict time limits.
